

Vista Del Mar

Instructions for gaining access to house key

Step One: As you face the front door, look to the left of the door and locate a wall shingle with a handle that looks different than the other wall shingles. This is actually a door covering the lock box for the key.

Step Two: VERY carefully grab the door handle which is attached by a magnet and it will reveal a lock box which contains the key to the home. Also you will see a small flashlight next to the box if needed.

Step Three: Open shingle door to reveal the dials and the release button. Rotate dials to the four digit code combination you were provided. Press down on the release button to open the door.

Step Four: Pull the door fully open, remove key and close compartment door and restore the shingle cover. Note: please leave the key on the dining room table upon your final departure from the home.
